

# GLENMORE RD, COATESVILLE

**EXTENSION/RENOVATION  
30M2 LIVING EXTENSION, NEW  
DECK(S), AND LARGE COVERED  
PAVILION AREA.**

## PROJECT DESCRIPTION

A family of three (including one young son) approached Downright Construction with the desire to extend and renovate their home to create better indoor-outdoor flow. They wanted to open their living space and extend their home out onto a stunning pavilion so that they could entertain all year round.

## PROJECT SOLUTION

Downright Construction was given the opportunity to complete the work as they demonstrated a high level of care and attention to detail. With Downright Construction's extensive knowledge and building experience, they were able to put plans and schedules together that were customised and best suited their client's needs, wants and desires.

## OUTCOME

Downright Construction completed a 30m<sup>2</sup> extension to the existing kitchen, dining and living area which led out onto a new deck(s) and large covered pavilion area. Some of the best features on this project were the wood burner fire/pizza oven where the family can sit year-round keeping warm, toasting marshmallows and cooking pizzas, the outdoor kitchenette, which allows for entertaining outdoors, and the large 6m frameless glass sliders on the pavilion, that can be kept closed during the winter months to hold the heat in and open during the summer months to better experience the stunning views and scenery of Coatesville.
